Clear Innovative Precision

Contents

1. Foreword

Thank you for purchasing this mobile phone. To get the best performance from your phone, please read this user manual carefully.

This model of mobile phone uses advanced technology. It allows communication signals to shift between single frequency mode and dual frequency mode.

This product also offers functions such as MIDI ringtones, Phonebook, Message, Alarms. It also features Calculator, FM Radio, Hearing Aid, Voice Calling Report, etc. which all help you use this phone at work or in everyday life and allows you to communicate in a more effective and convenient way.

Important Notices

You are strongly recommended to keep a separate written record of all the important data on the phone. The manufacturer assumes no responsibility for any data lost as a result of accidents, improper use, replacing batteries or any loss incurred by the third party which may arise from the use of this device. Our company reserves the right of amending the contents of this manual, and owns the right of final interpretation of the contents, as well.

2. Safety Precautions

▲ Please read through the following information carefully, and act in accordance with these rules, To prevent causing any danger or breaking any law.

Safe driving

1)Do not use the phone when driving. If you have to use the phone, use a personal hands- free kit.

2)Secure the phone safely in a phone stand. Do not put it onto any passenger seat or any place from which it may fall in, case of vehicle collision or emergency braking.

Turn off during a flight
Airplane flight is influenced by interference caused by mobile phones. It is illegal to use a phone on airplanes. Please turn off your phone during a flight.

Turn off within areas where blasting takes place
Be sure to strictly observe the related laws and statutes by turning off the phone when you are within, or in the vicinity of, an area where blasting takes place.

Turn off the phone when any dangerous substances are in the vicinity
Please turn off your phone when you are within a gas station or in the vicinity of any place where fuel and chemical preparations, or any other dangerous goods are stored.

In hospitals
Please obey the related rules or bylaws of the hospital when using your phone in a hospital. Be sure to turn off your phone when near any medical equipment. Your use of any wireless transmission equipment, inclusive of the phone, will interfere with any medical equipment that is not protected fully, and other electronic equipment. Should you have any questions in this regard, please consult a related physician or medical equipment supplier.

Interference
Each and every phones performance may be affected due to radio interference.

Professional service
The phone must be installed or repaired by professionals. You may suffer a risk to yourself when you install or repair this phone personally, this also goes against the warranty rules.

Fittings and battery

You should use fittings and battery acknowledged by the phone manufacturer only.

Proper use

Please use the phone in the normal way. Do not touch the antenna unnecessarily after the phone is turned on.

Emergency call

You can make emergency calls by entering telephone number (999, etc.) to request for emergency help. Make sure that the phone is turned on and has service. Press the Send Key to call out, and report your position and what has happened briefly. Do not end the call without authorization.

Note: Like any other phone, this phone's specific features may not be supported by some networks whose coverage or wireless signalling is problematic (some network do not support emergency calling service by 999). Therefore, do not rely wholly on this phone in case of emergencies (such as medical first aid, etc.). Please consult your local network operator for verification.

3.4 LCD Backlight

The backlight time duration and brightness on the display screen can be set. To adjust this select the Settings option in the main menu, select option 1 Phone Settings then Misc Settings. If you do not press any key after a certain period of time, the backlight will be turned off automatically when the set time duration expires.

4. Quick Introduction

4.1 Remove the Battery Cover and Insert the SIM Card

The SIM card stores your phone numbers, PIN (personal identification number), PIN2, PUK (PIN phone unlocking key), PUK2 (PIN2 unlocking key), IMSI (international mobile subscriber identity) codes and network information, as well as Phonebook and SMS (Message service) data, etc.

How to install SIM

1) On the backside of the phone, press the ridged part on the battery cover; pull down on battery cover to remove.

2) Locate the SIM card slot (labelled SIM1) insert the SIM card with the metal side facing down corresponding to the connectors. Note: The cropped corner of the SIM slot matches the card shape.

SIM Card Precautions:

1) Turn off the phone, and wait a few seconds before removing or inserting the SIM card again.

2) Handle the SIM card with care, as friction or bending can cause damage to the SIM card.

3) When the phone is not in use, please keep the SIM card in a place out of children's reach.

4) If an incompatible SIM card is inserted or the SIM card is damaged, the screen will display "No SIM Card" or "Insert SIM" after the phone is turned on. Take out the SIM card, check if it has been inserted correctly.

5) If the screen displays " SIM Card Damaged", please contact the network operator for repair.

4.2 Installing the Battery

1) Press ridged part and pull downwards on battery cover to remove

2) Place the battery into the cavity with the three gold columns on the battery touching the gold connectors in the phone and push the battery into place

3) Replace the battery cover, push up until tight.

4.3 Charge/Recharge the Battery

1) Find the charger socket on the side of the phone

2) Connect the charger via the charger socket, the shape of the plug must be consistent with the socket.

3) Connect the other end of the charger with power source. (Cable to USB port or USB plug supplied)
4) After charging has finished, switch off power and remover charger.
Notes:
If the remaining power in the battery is too low to turn on the phone, you need to charge the phone for a period of time, before the screen indicates the power level in the battery.
2) Make sure that the standard voltage and power source used is the rated voltage and power for the charger.
3) During the charging/recharging period, you may turn the phone on or off.
4) Use the battery only for its intended purpose. Never use any charger or battery that is damaged.

4.4 Use of Battery
When the battery is low:
1) The battery low message displays.
2) The empty battery icon blinks.

Battery Power Notes
1) If the battery is not going to be used for a long time, please charge the battery fully before putting it away.
2) The battery can be charged and discharged hundreds of times, but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, replace the battery.
3) If the battery is completely discharged, it may take a few minutes before the charging indicator appears on the display or before any calls can be made.
4) Your device is powered by a rechargeable battery. The full performance of a new battery is achieved only after 2 or 3 complete charge and discharge cycles.

5) If a replacement battery is being used for the first time or if the battery has not been used for a prolonged period, it maybe necessary to connect the charger then disconnect and reconnect it to begin charging the battery.

4.5 Turning Phone On or Off

1) Press and hold the End key and the phone will be turned on. The screen shows a Power-on display.
2) Enter the idle screen.
3) If set up. Enter your phone lock password when you are requested to do so, and press Send key to confirm.
4) Press and hold the End key to turn off the phone.
Note: The wallpaper screen is showed on the screen when the phone is switched on and remains in idle mode.

4.6 First Call

1) Insert the SIM card (first, turn off the phone and take out the battery). For detailed instructions on installation, please refer to "4.1 Remove the Phone's Back Cover and Insert the SIM Card".
2) Charge the phone's battery. Refer to "4.3 Charge/Recharge the Battery".
3) Press & hold the End key to turn on the phone.
4) Enter the area code and telephone number on the keypad, and press the Send key to call.

Note: Before using the phone, be sure to insert an effective SIM card into the phone at first, and charge the battery.

4.7 Use of Passwords

Your phone and SIM card have multiple passwords, which help prevent your phone and SIM card from being used illegally.

Enter the correct password when you are requested to enter any of the passwords that are shown below , then press the Send key to confirm. If you enter a wrong password, please press the End key to delete the wrong password, before entering the correct numerals. You may use the Security Settings in Settings from the main menu to change the PIN code, PIN2 code and Phone Lock password.

Phone Lock

The phone lock password is used to prevent your phone from being used illegally. Usually, the phone lock password is supplied together with the phone by the manufacturer. The default is 1234.

After the phone is locked up, you will be requested to enter the phone lock password before turning it on again.

PIN Code

PIN code (4-8 digits) is used to prevent your SIM card from any unauthorized use. The PIN code is usually provided together with the SIM card by the network operator. If the PIN verification function is activated, then you will be requested to enter the PIN code every time when you turn on the phone. If you have entered a wrong PIN code for three times, the SIM card will be locked up.

Warning: Once you have entered your PIN codes wrongly for three times, the SIM card will be locked up, and not be unlocked until you enter your PUK code. The PUK code is usually kept by the network operator.

PUK Code

The PUK code (a password used to crack the PIN code, 8 digits) is used to crack a locked PIN code. The PUK code is provided together with the SIM card by the network operator. If not supplied, please contact your network operator. In case you have entered your PUK code wrongly for 10 times, then the SIM card will stop working; if this happens, please contact your network operator to replace your SIM card with a new one.

PIN2 Code

The PIN2 code (4-8 digits) is provided together with the SIM card, and used to set such functions as "Call Cost" and "Fixed Dial", etc. To find out if your SIM card supports such functions, contact your network operator. If you have entered your PIN2 code wrongly for 3 times, the PIN2 code will be locked up, and not be unlocked until you enter the correct PUK2 code.

PUK2 Code

The PUK2 code (a password to crack the PIN2 code, 8 digits) is used to unlock a locked PIN2 code. The PUK2 code is provided together with the SIM card by the network operator. If not supplied, please contact your network operator. If you have entered your PUK2 code wrongly for 10 consecutive times, you will be unable to use those functions that can not be activated without the PIN2 code. To use such functions, contact your network operator and replace the SIM card with a new one.

Bar Password

To activate barred dial, it is necessary to use the Call-bar password. When you apply for such a network function, acquire this password from your network operator.

5. General Functions
5.1 Dial a Number

1) In Idle mode, enter an area code and telephone number, and press the Send key and confirm call to dial the number. Press the End key to end the call.

5) Code Set.

FM Radio

This is FM radio. Enter the FM radio interface, press the Down key turn on/off. Press the Left or Right to search the channel. Press the left side Up or Down button to adjust the volume. Press the End key to exit. On the FM Radio interface, press the Send key to access the following options:
1) Channel List: If you have already saved the radio channels, you can move the cursor to the channel you would like to listen to and play it. You can also select Edit in the options to edit the list.
2) Manual Input: Use the keypad to manually enter the Frequency of the channel you desire. If you know the frequency of the radio channel you would like to listen to, enter the frequency and press the Send key to listen. When editing the frequency, press the Left and Right to move the cursor.
3) Auto Search: The radio can automatically search

and save channels.
4)Settings/Background Play: Enter the background play mode.

Calendar
Accessed from Extra option in the main menu. Calendar shows monthly overview with date highlighted. Access Time and Date options from the Phone Settings option in Settings in the main menu.

Alarm
Accessed from Extra option in the main menu. If the Alarm is not turned on, then no alarm will sound even when the set time comes. If the Alarm is turned on an alarm will be given even if the phone is turned off. Please follow these steps to set an alarm:
1) Press the Up/Down key to select an alarm, press the Send key to enter either a pre-set alarm type or edit options. Use Left/Right keys to select ON. Press the Up or Down key to move the cursor to next option.
2) Set the time when the alarm is triggered .
Press the number key to input the time. Use the 24hr clock to ensure correct alarm time.
3) Select the repeat type: Once, Everyday or Custom. If you select "Custom", you can select which days with Left/Right keys and using the send key to turn them on and off. Press the End to save.
4) Snooze: Set length of time between alarm tones in snooze mode. When an alarm sounds, if you select snooze or do nothing to stop the alarm, the clock will assume that you have not heard the alarm, after a while, it will alarm sound again, but snooze function will stop after 3 alarm repeats.
5) Alert type: Set type of alarm. Ring is recommended.

Factory Default
Select " Settings— > "Restore Factory Settings", enter the phone lock password to activate this function.

7 Care Instructions:
7.1 Maintenance
• Keep the phone and all of its fittings in a place out of children's reach.
• Keep the SIM card in good condition. Do not bend or scrap it; be sure to avoid interference from static electricity. Use a piece of cloth that is static electricity proof, and contains no chemical detergents, to clean the SIM card.
• Avoid exposing the phone to moisture and shaking. Do not put it in directly sunshine. Liquid will cause corrosion of the metal in the electric circuits; and heat will shorten the life of the electronic component parts and damage the battery.
• Phone ID: when you have lost your phone or SIM card, the following information is important and should be recorded: SIM card serial number (marked on the card); phone serial number (15-digit), and client number given by the network operator.
• If you have lost your phone or SIM card, please contact your network operator immediately, to prevent any other person from using your phone illegally.
• If the phone is not in use for a long time (more than one month) after being turned off, please remove the battery from the phone, to avoid any electric leakage from the battery that can damage the phone. If the battery is not in use for a long time (or has discharged its power) use the mains charger. Cable or travel chargers may not work.

7.2 Battery Information

- Do not throw the battery into fire.
- Do not dismantle or retrofit the battery.
- Do not put the battery into any unauthorized device.
- Do not put the battery in any place where powerful mechanical impacts take place, or perforate the battery.
- The battery shall be kept in a cool and dry place, and away from high and exposure to direct sunshine.
- Do not use the lithium battery in a rather cold environment, as the battery is will not power for its maximal Standby/Call Time.
- Do not clean the battery by use of water or any organic solvent, or put the battery into water.
- Be sure to stop using the battery in case it gives out any peculiar smell or gets excessively hot.
- Be sure to stop using the battery if it suffers any crack, deformation, damage of any other type or any leakage.
- If any leaked battery fluid is splashed onto skin or clothes, rinse it off by using soap and clean water immediately; if any leaked battery fluid is splashed into eyes, rinse your eyes using clean water immediately and contact a hospital for medical treatment.
- Be sure to use the supplied battery and charger to avoid any damage to the phone caused by any erroneous charging.
- Turn off the phone before removing the battery.

7.3 Disposal of Used Battery

When the battery in the phone can not be used anymore, please replace it with a new one, and keep the old battery in a proper place, before handing it to the correct organization for disposal.
